

INSTRUCTIONS FOR ASSEMBLING MULTI TIERED BENCHES

STEP #1

Assemble the racking uprights and the cross beams with the beams at the level that you want your bench tops

(Note: bench assemblies are about 4"high and will add that much height to the top of the cross beams.)

STEP #2

See the enclosed Ebb and Flow bench assembly instructions for directions on assembling the bench tops.

(Note: these bench top trays are one piece, so there is no gluing of the trays.)
